## Caring for Your Extensions

After removing extensions, gently comb to remove tangles. If hair is very tangled, use a spray-on conditioner before washing. Use a conditioning shampoo and warm water to gently work from weft base to ends. Do not scrub. Hold the extension at the clip line, rinse well and follow with conditioner. Lay hair flat on towel and gently roll to squeeze out excess moisture. Allow hair to air dry or use a hair dryer on lowest setting. All thermal tools should be used on the lowest setting to avoid scorching the hair. Steam rollers are the safest way to curl your extensions. Sleeping or swimming while wearing clip-in extensions is not recommended. It is recommended that only professional stylists cut your extensions. **DO NOT BLEACH.**

## APPLYING YOUR HAIR WEFTS

**NOTE:** Always apply wefts starting just below the ears. When working with a complete kit, a suggestion would be to start with a 7" weft, follow with the two 6" wefts moving from the centre of the head towards each ear, then finally the 8" weft. The four 1 ½" wefts are to be used for the sides of your head. Let your creativity be your guide.

**1**

### 1. CREATE A PART

Move the tail comb under your hair, along the scalp from the right to the left to create a part. Lift up the sectioned off hair and secure with clips at the top of the head.

**2**

### 2. ATTACH THE WEFTS

Align weft with the part, with the clips facing inward. Position the weft so that the middle clip is centered on your head. Move center clip down-ward, catching your hair and snap shut.

**3**

### 3. ATTACH THE WEFTS

Stretch weft to the right, move clip downward, catching your hair and snap right clip shut. Finally, stretch weft to the left, move clip downward, catching your hair and snap left clip shut\*.

**4**

### 4. ATTACH THE SIDE WEFTS

Apply two 1 ½" wefts to each side of your head to add volume and length to the sides.

**\*Helpful Hint:** A small amount of back-combing and/or hair spray at the attachment points will anchor the clips and prevent sliding.
